To meet this need, some start a fire in the coal range, This is a troublesome, slow way, also the uncomfortable way. There is no longer a need to start a coal fire to heat the water.

### THERE IS A BETTER WAY THE GAS HOT WATER HEATER

This is a simple, still very efficient appliance which is connected to the regular hot water pipes. It will supply hot water to every faucet in the house in quantities ample to meet every requirement. It is easily operated, cannot get out of order and does not heat up the house.

### COSTS BUT LITTLE TO **OPERATE**

As it only consumes gas while water is being heated, there is no expense when hot water is not required. Call at
